Glass Guard

CONTAINS 60% Ethanol

Glass Guard represents the latest in nature positive, self cleaning nanocoatings for glass surfaces.

It's a permanent coating that chemically bonds to the glass surface to form an easy clean protection layer. The resultant surface will be dirt, water and oil repelling and display self cleaning, non stick properties. The product is UV stable and lasts over 10 years in most circumstances.

Ideal for use on shower screens, marine glass, architectural glass, balustrade and any other glass areas. Minimal need for chemicals and water to clean the surface means a saving in maintenance and cleaning costs as well as a positive effect on the environment.

DIRECTIONS FOR USE: Clean the surface with Rapelle Glass Guard Pre-Cleaner. Apply a fine mist of Glass Guard using a hand sprayer or atomiser (ask us) and using a clean rag or paper towel wipe over entire area. Do 1/2 m2 at a time Upon completion take a clean rag and buff over entire area. Coverage is approximately 70 meters square per litre. For more detailed application instructions please call a Rapelle Representative.

FIRST AID: If poisoning occurs contact a Poisons Information Centre (phone 13 11 26 anywhere in Australia) or a doctor. If swallowed do NOT induce vomiting, Give a glass of water. If in eyes wash material from eyes with running water. If on skin wash with water.
